- External Email -

Wendy,

The files are designated as HIGHLY CONFIDENTIAL – SOURCE CODE and are available at this URL:

<https://sendfile.quinnemanuel.com/pkg?token=cd00904b-b5d3-4512-a441-d7324594b881>

I will separately send you the decryption information.

Thanks,
Jeff

Wendy,

We expect to provide the files tomorrow. Our forensic folks are double-checking the files, as you noted.

Best regards,

Jordan R. Jaffe // Quinn Emanuel // 415.498.0556 // jordanjaffe@quinnemanuel.com

Jordan,
When will the files below be provided to us? I'm sure your forensics team can confirm quickly that they do not contain Google data; regardless, we are willing to maintain them on an AEO basis.

Wendy

Subject: Re: 14K files

Jordan,

Stroz has created the following files:

- Fuzzy hash list for 50 priority files
- Fuzzy hash list for 15 largest files
- Block hash list for 50 priority files
- Block hash list for 15 largest files
- SDHash for all files
- SDHash for all files, excluding known good files
- DTsearch Index word list
- File listing with MD5 & SHA1 Hash

The files were left on the computer in a folder on the Desktop called "Stroz_Output". Please produce these files tomorrow in the same format that Aaron saved them in. They are small enough for FTP.
